ABOUT US

Worldwide Cutlery, Cookware and Kitchenware leader

Mundial Inc. is the North American marketing, sales and distribution arm for Mundial SA, Porto Alegre - RS, Brazil. We manufacture the world's highest quality scissors, knives, related kitchen accessories and personal care implements.

The group and the Mundial trademark were established in Germany in 1931, by Paul Zivi. This noted metallurgist, along with his team of skilled engineers and designers, developed the most sophisticated techniques for designing and manufacturing high quality cutlery. The allegiance to quality has been maintained throughout the years for all Mundial products.

With a growing business in retail cutlery through gourmet, specialty and department stores, Mundial products are squarely positioned as high quality and upscale, but with a distinct value advantage. Thanks to

manufacturing efficiencies and more competitive costs of raw materials (Brazil is one of the largest producers of steel in the world), Mundial can position its top quality products at extremely affordable prices. Mundial combines Old World craftsmanship with modern technology to produce a broad selection of products unmatched in the world for strength, durability, beauty, comfort and value.

CAST ALUMINUM

Aluminum is a highly durable and versatile material and, therefore, widely used in the manufacture of cookware and housewares.

Cast aluminum pans usually have a thick structure while being lightweight. An excellent choice for cooking, as they withstand high temperatures and are very resistant.

With excellent conductive capability, aluminum distributes heat quickly and evenly throughout the surface. In the case of pots, saving energy and providing uniform cooking.

PA9000

- Nonstick ceramic
- Resistant aluminum design
- High temperature resistant paint
- Available in 3 colors: white, black and orange

- Fill up the top of the lid with cold water and ice cubes.
- Take it to the stove.
- The vapor inside the pan will condensate when in contact the cold aluminum lid.
- This vapor slowly humidifies the food in a continuous cycle, as in an oven, preserving flavor and aroma.

PA8000

- Distributes and retains the heat
- Heavy thickness of walls and bottom
- 6 enamel layers
- Durable design

CAST IRON

Cast iron is one of the oldest materials used to make pots and pans. It is durable and has excellent properties for heating, cooking, roasting and baking. One of these properties is the perfect distribution of heat that allows an extended cooking, enhancing the taste and aroma of foods.

In addition, cast iron cookware retains heat longer than other materials, making them great choices to go from oven / stove straight to the table, with practicality and beauty.

The high thickness of the base, lid and walls, coupled with the 6 layers of enamel coating provide a permanent finish, exceptional strength and durability. It is certainly a product that can pass through generations by following some care and conservation (described in the manual). The cast and enameled iron Hercules cookware are produced by hand, have a great versatility of use and can be used in different heat sources such as a conventional oven, gas, electric plates and glass ceramics (halogen, radiant and induction). They can also go to rechauds or grills. Just do not use in microwave ovens.

Teflon® Platinum by Dupont

The most scratch and abrasion resistant non-stick finish to date. It is the first Teflon® coating that is able to withstand normal metal utensils and even abrasive scouring pads. Using a three-layer coating system and with a minimum thickness of 40 microns, it contains microscopic particles of an extremely hard mineral; the metal utensils slide over these particles without damaging the Teflon® matrix in which they are set, thus preserving its non-stick properties.
