SAFEGUARDS ARE THE SIGN OF A MARKET LEADER

ANTIMICROBIAL HANDLES

Sanitized® Antimicrobial Protection — Guarantees Safety for Your Customers

Many Mundial knives and accessories have **Sanitized Antimicrobial Protection**, the safe treatment of the polypropylene handles designed to guard against the growth of bacteria, yeast, mold and fungi.

Without Sanitized®

Microbes attack and destroy unprotected plastics.

With Sanitized®

Sanitized® protects plastics permanently against microbial attack. The formation of unpleasant odors and destruction of the material are permanently prevented.

- Sanitized additives are incorporated into the knife handle during the manufacturing process
- Decreases the risk of unpleasant odors while improving the hygiene of the knives
- A highly respected and widely used technology tested in accordance with international standards
- Thorough cleaning and maintenance still required on all products treated with Sanitized additives

CERTIFIED BY

NSF Certification — Demonstrates Our Commitment to Quality Products

Mundial knives are NSF approved, meeting all food service industry standards for sanitation.

Trackable Knives — Ensures Quality and Control Throughout Product Life

A unique tracking number is stamped on the blade of many Mundial knives.

- Enables knives to be identified throughout their useful life
- Facilitates quality assurance and monitoring
- Provides controls for scheduled sterilizations and resharpening
- Determines useful life to facilitate re-ordering — minimizes inventory while maximizing productivity

Over 80 Years of Uncompromising Quality

Worldwide Cutlery Leader

Mundial Inc. is currently among the leading North American brands of cutlery and kitchen accessories sold to the restaurant and institutional markets. We are also a leader in the

retail and industrial scissors and shears categories. With a growing business in retail cutlery through gourmet, specialty and department stores, Mundial products are squarely positioned as high quality and upscale, but with a distinct value advantage. Thanks to manufacturing efficiencies and more competitive costs of raw materials (Brazil is one of the largest producers of steel in the world.) Mundial can position its top quality products at extremely affordable prices. Mundial combines Old World craftsmanship with modern technology to produce a broad selection of products unmatched in the world for strength, durability, beauty, comfort and value.

When Is a Knife More Than Simply a Tool?

When its design reflects the perfect marriage of form and function – delivering maximum comfort, balance and performance. When it is made from the best steel alloy to ensure precision cutting and a lifetime of durability. When it is fully forged for greater strength, resilience and

lasting sharpness. And when that same focus on excellence in design and performance is applied across the board to a full range of knives and accessories, each one ideally suited to its culinary task. In other words, when it is MUNDIAL.

THE MUNDIGRIP DIFFERENCE

The totally unique, ergonomic handle in our MundiGRIP line has been developed based on extensive industrial heavy-duty use tests. This shape provides unequalled comfort and safety regardless of the many task-specific ways it can be gripped.

Non-slip, ergonomic grip provides optimum control and performance

Antimicrobial handle guards against the growth of bacteria, yeast, mold, and fungi
Soft-textured MundiGRIP compound ensures maximum comfort and feel

Unique, multi-function handle design minimizes fatigue, muscle strain, and overall hand and arm stress during repetitive stabbing, cutting or slicing tasks

MARKS SERIES

Marks by Mundial cutlery is made from high-carbon Japanese steel, ensuring greater durability and the highest edge retention under the most demanding conditions. Ergonomic non-slip grip handles assure extreme comfort for long term use. Marks by Mundial offers an entire product line to handle all of your food preparation needs. The blades and handles are matched for perfect balance, which minimizes fatigue. NSF approved, these knives are treated with sanitized antimicrobial protection, which protects the knife handles from bacterial growth. The Marks series of products meet all international safety and health standards.

Professional chefs are the most demanding users of kitchen tools. They count on products that enable them to do their best—day in and day out—with speed, precision and ease. That’s why chefs all around the world have made Mundial their top choice for professional-grade knives.

Mundial 5600 Series knives and accessories have Sanitized® Antimicrobial Protection, which is the safe treatment of the polypropylene handles to guard against the growth of bacteria, yeast, mold and fungi.

Mundial knives are also NSF® approved, ensuring that they meet all foodservice industry standards for sanitation. But that’s just the beginning. Mundial knives are also thoughtfully designed to simplify food preparation tasks, ensure comfort and minimize fatigue—even after a long and demanding day in the kitchen.

Mundial begins by selecting high-carbon stainless steel to combine the highest edge retention with easy resharpening. The company’s computer-aided design process creates the perfect shape for each knife according to its function. Computerized grinding and polishing machines ensure precise tapering from tip to bolster. Finally, to deliver optimum performance, every Mundial knife is hand sharpened and individually tested.

Mundial puts just as much thought and effort into the design and manufacture of its knife handles. Each is ergonomically designed and crafted to provide a secure non-slip grip even when wet. Mundial carefully matches each blade and handle so that they are perfectly balanced. A good grip and perfect balance minimize fatigue and make even large-scale food preparation fast, easy and precise.

PRO SERIES

The **Mundial Pro Series** is a line of cutlery specifically designed for the food processing industry. Made from high-carbon stainless steel for increased durability, Pro Series knives have a hardness between 54 and 57 HRC. All Pro Series knives are NSF® approved, meeting all foodservice industry standards for sanitation.

Pro Series knives and accessories have **Sanitized® Antimicrobial Protection**, which is the safe treatment of the polypropylene handles to guard against the growth of bacteria, yeast, mold and fungi. During the manufacturing process, Sanitized® additives are incorporated directly into the knife handles, protecting them against microbial attack. The inclusion of these additives also decreases the risk of unpleasant odors while improving the hygiene of the knives.

Sanitized® Antimicrobial Protection is a highly respected and widely used technology all across the world. The process is continually tested in accordance with international standards.

While Sanitized® Antimicrobial Protection adds an extra safeguard against bacterial growth in materials, thorough cleaning and maintenance is still required on all products treated with Sanitized® additives.

The Mundial Pro Series knives are also **fully trackable**. During the manufacturing process a unique tracking number is stamped on each blade, which enables the knives to be positively identified throughout their useful life. This tracking system facilitates quality assurance and quality monitoring while also providing controls for scheduled sterilization and resharpening. Useful life cycles can also be established, which facilitate re-ordering and minimize investment in inventory while maximizing productivity.

Fully Forged Cutlery

Designed and Independently Verified To Be Among The Best in The World

How do Mundial knives compare to other premium cutlery? In addition to our own extensive quality control procedures, Mundial regularly submits its products to an international independent testing facility. Its standardized testing methodologies continue to show that Mundial knives are among the best in the world.

The Value of a Fully Forged Knife

Mundial fully forged knives are manufactured in a process that combines innovative technology with Old World tradition and expertise. In the forging process, steel is heated to an extremely high temperature, set into a die and hammered into the shape of the basic blade. Following a process of heating and cooling, the forged blade is ground to create a full taper to the cutting edge. The result is a stronger, thicker, more resilient blade that flares smoothly at the heel to blend into the shape of the handle. Cutlery that is fully forged offers an array of key benefits including greater tensile strength, increased durability, lasting sharpness and better balance and control.

HOW DOES A PERFECT KNIFE COME TOGETHER?

- HANDLE**
 Designed to securely hold the full tang, one of the most authentic parts of a forged knife, our handles are ergonomically designed and crafted for comfort and long life.
- BOLSTER**
 The main feature of any truly forged knife, it ensures balance and protection.
- BLADE DESIGN**
 Mundial computer-aided design process creates the perfect shape for chopping, dicing and slicing.
- BLADE GRINDING**
 Computerized grinding and polishing machines ensure precise tapering from tip to bolster.
- STEEL DEVELOPMENT**
 Mundial Chrome Molybdenum stainless steel is processed to provide the best combination of edge retention and sharpening ease.
- EDGE**
 Every Mundial knife is hand sharpened and individually tested for ultimate performance.

TITAN *New*

TITAN SERIES

The new **Mundial Titan** forged series offers cutlery of unparalleled quality and value. The handle is a perfect shape which provides excellent comfort and control. The tapered grinding and stone finishing means the edge will be long-lasting and easy to re-sharpen. The blade, bolster and handles are matched for perfect balance and ease of use. The steel used is premium grade stain-free, high carbon steel. The Titan Series is engineered and designed by Mundial to offer superior quality and a lifetime limited warranty. **EACH KNIFE PACKAGED IN A CUSTOM KNIFE GUARD!**

Commitment to Service & Category Growth

Mundial's uncompromising commitment to quality extends beyond our products to our relationships with our trade partners and our efforts to grow the scissors and shears category through:

- Prompt, responsive customer service and unmatched product availability
- Broad product assortment spanning every price point
- Promotional packs, gift sets and improved packaging for value-added merchandising and display opportunities

Through a combination of old world craftsmanship and technological innovation, Mundial is setting a new standard of excellence in quality, selection and value.

Mundial Out-performs the Competition in Sustained Cutting Efficiency

- Dressmakers' Shears:**

 - wide range of cutting tasks
 - able to cut through fabric of many weights
 - designed with bent or offset handles so that whatever is being cut does not have to be lifted off the cutting surface
 - ensures the shears do not harm the cutting surface
- Sewing Scissors:**

 - light to medium cutting tasks such as trimming and clipping seams and loose threads
- Embroidery Scissors:**

 - light work that entails close detail
 - blades are slim and sharp with fine, precise points
- Thread Clips:**

 - quick snipping and tight seam stitch cutting
 - ring fits over the ring or middle finger and the clip rests in the hand
 - thumb and index finger work the spring action blades
- Pinking Shears:**

 - finishing seams with a resistant jagged edge
 - prevents the threads in the fabric from coming undone and loose
 - decorative appliqué cutting
- Buttonhole Scissors:**

 - opening buttonholes without stretching or damaging the stitches
 - features an adjustable screw so all buttonholes can be cut at an even length
- Appliqué Scissors:**

 - trimming excess fabric or loose threads in layered applications
 - trimming sheer and delicate fabric in lace insertion
 - designed with one narrow and one wide blade; wider blade protects the fabric underneath while the narrow blade makes the cut
- Quilting Scissors:**

 - cut easily through heavy quilting material
 - features stainless steel blades with a special knife edge
- Hobby/Craft Scissors:**

 - detailed cutting of items such as paper, yarn, cloth, thread and other crafting materials
- Pocket/School Scissors:**

 - commonly used by children for crafts and general cutting
 - blunt ends that prevent the point from tearing or ripping
- Multi-Layer Shears:**

 - cutting through multiple layers of fabric as well as single layers of thicker craft material
 - features heavy-duty, extra long, stainless steel blades with a double knife edge
- All Purpose Shears/ Straight Trimmers:**

 - general purpose; cut anything around the house
- Barber Shears:**

 - cutting hair
 - serrations on one blade for cutting accuracy
- Take-A-Part Shears:**

 - cutting meats and vegetables, cracking nuts and uncapping bottles
 - great for plastic or canvas crafts
 - notch can snip small pieces of wood and wire
 - take-a-part blades for easy, thorough cleaning

Care and Use Tips for a Lifetime of Performance

Properly cared for, quality scissors and shears will last for many years. Here are a few tips on the care and use of Mundial scissors and shears.

- To clean blades, wipe them after each use with a clean, soft cloth; do not use water.
- Use the right scissors or shears for each job.
- Oil the pivot screw on scissors and shears every few months. Place a drop of oil on the screw, open and close a few times and wipe off excess oil.
- Never force a cut. If scissors cannot complete the cut, stop cutting. Cut heavy materials near the pivot, not near the tips of the blades.
- Cut carefully; hitting metal or plastic objects can cause nicks in the blades, damaging them and minimizing their cutting effectiveness.
- Handle carefully; dropping scissors can knock them out of alignment, reducing cutting accuracy.
- Store in a pouch or wrap in a clean cloth in a safe, dry place to prevent accidents and damage.
- Do not sharpen pinking shears by reworking the zigzag profile of the teeth; a simple edge grinding is sufficient.
- Blades should be sharpened if they do not cut evenly from pivot point to tip. Check Yellow Pages for professional sharpeners.

Mundial Classic Forged Scissors are made of the finest, hot drop forged and fully-plated carbon steel. Mundial's special Knife Edge technology, available on Classic Forged Dressmakers' Shears, features a precision cut blade that glides through multiple layers of fabric with ease, delivering optimum results.

Knife Edge Blade

The precision Mundial Knife Edge blade cuts through multiple layers of fabric easily and cleanly to the very tip.

Micro-Serrated Blade

To hold even the sheerest fabric in place without slipping Mundial pioneered a fine Micro-serrated bottom edge into their blade technology.

The Stay-Set™ Pivot

Mundial engineered the Stay-Set™ pivot assembly for their Heavy Duty Industrial shears.

Customize the ride on your Mundial shears to your own preference; simply adjust the Stay-Set™ pivot assembly once with a screwdriver, and it stays set for comfortable cutting power.
